

Products Attachments for Fork truck

Pic. 501 Box turner

for fork lift trucks

Turnable range 220°

Special equipment: Pallet fork tines

The turning angle of 220° allows the restless unloading of boxes.

Standard equipment:

- For fork lift trucks - connected to the pallet fork carrier (ISO FEM II - 407mm height of pallet fork carrier or ISO FEM III - 508mm height of pallet fork carrier)
- Width of pallet fork carrier 1200mm
- With foldable, adjustable sidetine
- Rotation to left side 220° (rotation to right side deliverable without surcharge)
- With 1 doubleacting hydraulic cylinder (for 3000kg lifting capacity with 2 hydraulic cylinders)
- By choosing model with 2 hydraulic cylinders are pallet fork tines form B needed. (Higher crossing height)

Changing of gravity center: +165 mm

Machine gravity center: 80 mm

Special designed attachments are deliverable on request !

Lifting capacity	Weight
1500 kg (ISO FEM II)	ca. 280 kg
2500 kg (ISO FEM II)	ca. 290 kg
3000 kg (ISO FEM III)	ca. 365 kg

Additional:

Model with 2 pallet fork tines 1100mm (1500kg capacity/pair)

Model with 2 pallet fork tines 1100mm (2500kg capacity/pair)

Model with 2 pallet fork tines 1100mm (3000kg capacity/pair)

Model with 2. hydraulic cylinder

Model with hydraulic sideshift (200mm, + 1xDA needed)

Model with switch valve 12V/45l in connection with sideshift

Model with mechanic adjustable downholder
