

Brackets for rebuilt of attachments for loader with other quick couplers.

Manitou

Merlo

Euro -cranked/straight

INFORMATION

There are many different coupling systems existing, so we can only show a few of deliverable brackets. Non shown brackets for quick coupling systems and direct connections are deliverable on request. The brackets are delivered in single parts. We recommend to weld these parts to the attachment after checking all measures directly with the loader. Check also tipping angles, end stops and possible collisions between attachment and loader.
